

Desktop Publishing 2009

Topic:

Ewaste is electronic waste. It includes discarded computers, mobile phones and other electronic devices. These devices contain serious contaminants such as heavy metals so it is important they are recycled rather than disposed of in landfills. eDay is a day when people can drop off their Ewaste at recycling points about the country so it can be recycled safely.

Tasks:

All tasks are created on your computer – you do not need to print anything off.

1. Create an advertisement that will be run in the Avenues magazine. The purpose of the advertisement is to encourage people to support eDay and bring their eWaste to one of the recycling points. Information is on the file 'eday details'. You may use or write any other text or headings you wish and use any images you wish.
2. Create a circular sticker which people will be given when they recycle their ewaste. Use the text on the file 'sticker'. This may be formatted in any way you wish and any images may be used.
3. Create an A4 informative newsletter that will provide factual information about eWaste. Use the text files 1, 2 and 3 and any images you wish.

Judging criteria:

Work will be judged on:

- Layout with consistent features across all tasks
- Clear and easy to view
- Use of colour and lines as appropriate
- Eye-catching and original
